**CLEAN AIR AMERICA, INC.™**

UL 508A:2005 CAN  
CSA C22.2 No. 14:2005

Clean Air America, Inc. products are proudly used in over 300 educational institutions nationwide:

## WeldStation™ LEAF (Low Energy Air Filtration)

**WeldStation™** - Top of the line welding smoke removal booth for premier training and manufacturing facilities. The world renowned WeldStation™ Welding Booth now features the LEAF configuration providing a self-contained welding booth with the lowest energy usage and noise level on the market, while still achieving ACGIH's preferred method of capturing weld smoke.

- Increased welder safety
- Up to 80% energy savings
- Longer filter lifetime for lower cost
- Economiser for automatic start/stop
- Configuration flexibility for single or dual units

## Portable Fume Arm

**Portable Fume Collector** - Offers a high level of filtration and extraction capacity. Available with a 6" diameter and 7' or 10' long arm. Easy to use, plugs into single phase 110 volt outlet. Clean Air Portable systems are a great solution when you need a highly moveable filtration unit.

- On-demand pulse cleaning system
- Long filter life reducing cost of operation
- Easy to move
- Extraction capacity of around 1,000 CFM with 8" arm
- Supplied with cable, filter, fume arm, and plug

## Down Draft Table

**The Down-Draft Table** is extremely powerful for its compact size. Housing a high-efficiency filter and a capture velocity above 200 feet per minute, it is one of the most powerful on the market. If you need a single station for a welding, grinding and/or plasma cutting application, the

Clean Air America Portable Down Draft Table is your solution.

- Completely self-contained
- Extremely portable
- 110 volt single phase power
- Heavy duty grating

## Smart Collector

**The Smart Collectors** are designed for weld smoke, grinding particulate, laser and plasma cutting dust and various other mainly

dry filtration applications. Available in a variety of sizes ranging from 1-48 cartridges and air volume of 500-30,000 cfm and more.

- Quick access filter and motor door
- Fire suppression system available
- Lowest overall noise level
- Incredible filter life for lower operation cost

## FlexiBooth

Used for manual welding, grinding, sanding applications and available in a variety of sizes ranging from 5' - 12' wide and different heights. To take advantage of the true back draft effect, (preferred method of capturing welding smoke per ACGIH)

Clean Air America's design team sized the Clean Air Flexi-Booth™ to efficiently overcome the heat of welding and the pull of gravity.

- Extendable three position work table
- Low Maintenance requirements
- High-intensity LED work area lighting
- Built in acoustical lining
- Booth size: 72"H x 58"W x 41"D

## Ducted Air Filtration Systems

Clean Air America uses the industry's top clamp-together attachments with smooth interior style ducting. This is very easy to install, highly flexible, and uses a clamp to secure each fitting. In comparison to flanged ducting, Clamp Together Style ducting saves 50-70% of installation time. This style ducting is available in up to 24" diameter.

- Clamp together ducting system
- Can be used with Backdraft Hoods, Clean Air Weld Booths and Clean Air Hoods
- Quick and easy installation save labor costs
